info@first-er.com

A proper hazard analysis and rescue procedures must be established prior to any worker entering the confined space. This is done so that injured workers may be quickly and safely removed. The time to prepare for the rescue is before entry.

“WE ARE YOUR CONFINED SPACE PROFESSIONALS”

Our standby teams are trained and equipped members who are full time employed rescue professionals in both public and private rescue teams. We have a proven track record of hundreds of confined space entries throughout Ontario with ZERO INCIDENTS!

We are multi-disciplined with different combinations of certifications and skills among team members that make it possible to match your rescue needs.

- Board Certified Health and Safety Professionals
- Certified Health and Safety Consultants
- High Angle Rescue Professionals
- Hazardous Materials Emergency Response Professionals
- Certified and Licensed Medical Response Professionals
- Certified Training Professionals

We are committed to be the most comprehensive and capable Rescue and Training organization by constantly upgrading training and equipment.

With a highly skilled full-service Confined Space Rescue Team. Our team ensures the safety of your workers, full compliance with Provincial and Federal legislation.

Most of all, we offer peace of mind.
