24HR EMERGENCY RESPONSE

www.first-er.com

First Response provides immediate and rapid response to any release to the natural environment. This can be a simple fuel spill from a truck accident, or a major toxic release from an industrial plant. Highly trained and outfitted crews will respond to your situation and provide immediate stabilization and mitigation to ensure complete environmental compliance.

First Response operates to serve both transportation and fixed facility operations. All our Crew and Equipment are dedicated to emergency response; thus, our deployment and site arrival is the industry leading trend setter.

The containment and collection of hazardous materials, haulage and disposal of the waste is conducted under the strictest of safety procedures and in complete compliance with all regulatory bodies such as the MOECC and Transport Canada.

First Response is licensed by the Ontario Ministry of Environment for both Transportation and Disposal of most classes including explosives and other dangerous materials.

Our operation involves the response to high hazard spills and as such we have the industry leading mobile Decontamination Trailer and mobile Air Monitoring unit.

One call to our 866-service number will activate the necessary crew and equipment to mitigate your incident 24/7/365.
